

Relias Publishes BlackTree Healthcare Consulting's OASIS Training Content

Conshohocken, PA. – October 25, 2017 – [BlackTree Healthcare Consulting](#) (“BlackTree”), the leader in post-acute healthcare consulting, is proud to announce that the seven-part OASIS training series they developed for [Relias](#), the leader in online healthcare training, has been published and is now available through the Relias Learning Management System.

This seven-part series, which was developed specifically for clinicians, is designed to help agencies increase OASIS accuracy and inter-rater reliability. By using real-life scenarios in an interactive format, this content is focused on understanding OASIS data elements to teach learners how to interpret, assess and document.

“BlackTree is excited for the opportunity to collaborate with Relias in creating educational materials that will help standardize OASIS trainings and provide clinicians with a solid foundation and understanding of CMS guidelines,” said Nick Seabrook, Managing Director. “BlackTree continues to be dedicated to helping agencies address some of the financial and operational challenges the post-acute healthcare industry is facing today, and looks forward to creating future content that will help agencies set themselves up for success.”

Current Relias customers can now access the OASIS training series by logging into their Relias account and navigating to their Learning Management System. Additionally, non-Relias customers can request a demo by clicking the following link: <https://www.relias.com/pac-demo-request>.
